Proveris Scientific Achieves External Certification to the ISO 9001:2015 Quality Standard

Hudson, MA, October 9, 2018 – Proveris Scientific Corporation, a leading provider of services and technology to advance the science of aerosol and spray products, today announced that it has achieved certification status under international quality standard, ISO 9001:2015.

This is a major accomplishment for the organization, having transitioned from the previous 2008 edition of the standard, while concurrently moving to its new facility in Hudson, MA. Proveris achieved its certification through TUV Rheinland of North America, Inc., its certification body accredited through ANAB. Proveris's ISO 9001:2015 certification is in force with an expiration date in October, 2021.

"We are highly committed to delivering quality products and services to our customers globally," says Proveris Scientific Founder and CEO, Dino Farina. "We recognize that continual improvement is an essential part of achieving customer satisfaction and we constantly strive to exceed our customers' expectations for quality."

About Proveris Scientific

Proveris Scientific Corporation advances the science of spray and aerosol products by driving new technology development for high performance spray characterization, capture, and analysis while leveraging our expertise, experience and core technologies. With customers' success as their central motivating force, Proveris Scientific adds value to a global customer base with "complete solutions" that include product innovation, technical services, systems, consumables and educational training. Since its founding in 1995, the company has accelerated the development of the top spray and aerosol drug products and has deployed its systems at more than 100 pharmaceutical development and manufacturing sites around the globe. Proveris's systems are the industry standard and are used by the FDA, CFDA, and the pharmaceutical industry to generate submission-ready data. Proveris is certified to ISO 9001:2015 by TUV Rheinland of North America, Inc. and has more than 20 patents on its technology issued in United States, Europe, and Asia.
